

# U.S. ARMY MATERIEL COMMAND

## U.S. ARMY TACOM LIFE CYCLE MANAGEMENT COMMAND (TACOM)

The TACOM Life Cycle Management Command, a major subordinate command of the Army Materiel Command, headquartered in Warren, Michigan, unites all of the organizations that focus on Soldier and ground systems throughout the entire life cycle.

The TACOM LCMC consists of the Integrated Logistics Support Center, Program Executive Office-Combat Support and Combat Service Support, Program Executive Office- Ground Combat Systems, and Program Executive Office-Soldier.

The TACOM LCMC is also aligned with several business partners: the U.S. Army Tank Automotive Research, Development and Engineering Center; Army Contracting Command-Warren; U.S. Army Armaments Research, Development and Engineering Center; the Natick Soldier Research, Development and Engineering Center; Edgewood Chemical and Biological Center; Joint Program Executive Office for Chemical and Biological Defense; and the System of Systems Engineering & Integration Directorate.

### What TACOM LCMC does

- The TACOM LCMC mission is to develop, acquire, field, and sustain soldier and ground systems for America's warfighters.
- If a Soldier eats it, wears it, drives it, or shoots it, TACOM LCMC develops, provides, or sustains it.
- More than 19,000 teammates at approximately 109 locations around the world work together to get products and services to the Soldier faster, make good products even better, and minimize life cycle costs.
- TACOM LCMC plays a vital role in the Army's efforts to sustain, prepare, reset, and transform its operations. The Command manages its products, people, processes, and culture in order to deliver warfighting capabilities and to enhance Soldier readiness.
- Successful execution of our mission requires effective communication and coordination among the acquisition, logistics, and technology (ALT) organizations that are part of the TACOM LCMC.
