

U.S. ARMY MATERIEL COMMAND

AVIATION AND MISSILE COMMAND

PRIMARY LOCATIONS

Headquarters
Redstone Arsenal, Alabama

Corpus Christi Army Depot
Corpus Christi, Texas

Letterkenny Army Depot
Chambersburg, Pennsylvania

CORE COMPETENCIES

Sustainment Logistics

Support to Acquisition

Research Development and
Engineering

Calibration

Supply Availability

Contracting

Field Maintenance

Aviation and Missile Command (AMCOM) develops and delivers responsive aviation, missile and calibration materiel readiness to the U.S. Army in order to optimize Joint Warfighter capabilities at the point of need. As a life-cycle management command, AMCOM is dedicated to integrating engineering, sustainment, logistics and contracting in order to support the product life-cycle management efforts. AMCOM accomplishes this by partnering with the Army Contracting Command-Redstone and the Aviation and Missile Research, Development and Engineering Center to deliver the contracting, engineering and logistics expertise needed to sustain readiness across the Aviation and Missile force. AMCOM is a values-based organization – people first, Soldiers always – enabling readiness to meet the emerging global requirements of the Army.

Corpus Christi Army Depot supports the repair and overhaul of aircraft and aviation systems, while **Letterkenny Army Depot** provides the same support to missile systems. Both depots have been designated as Centers of Industrial and Technical Excellence.

The Aviation Center Logistics Command (ACLIC) provides the supply and maintenance support to the U.S. Army Aviation Center of Excellence at Fort Rucker, Alabama. This mission is critically important to the long-term readiness of the Army. Since every Army aviator learns to fly at Fort Rucker, every type of Army helicopter is maintained there.

AMCOM's U.S. Army Test Measurement and Diagnostic Equipment Activity manages the Army's metrology and calibration program, which ensures that all Army test and measurement equipment supporting Soldiers worldwide is calibrated accurately.

The AMCOM Logistics Center manages multiple logistics programs in support of all AMCOM missions and strives to achieve sustainable materiel readiness to ensure Soldiers receive the support they need.

The Security Assistance Management Directorate executes a multi-billion-dollar security assistance mission that provides U.S. aviation and missile equipment to allies and partner nations.
