

U.S. ARMY MATERIEL COMMAND

ARMY SUSTAINMENT COMMAND

PRIMARY LOCATIONS

Rock Island Arsenal, Illinois
Headquarters

401st AFSB, Camp Arifjan, Kuwait

402nd AFSB, Fort Shafter, Hawaii

403rd AFSB, Camp Henry, Korea

404th AFSB, Joint Base
Lewis-McChord, Washington

405th AFSB, Kaiserslautern, Germany

406th AFSB, Fort Bragg, North Carolina

407th AFSB, Fort Hood, Texas

CORE COMPETENCIES

Army Field Support Brigades

Logistics Readiness Centers

Logistics Civil Augmentation Program

Army Prepositioned Stock Sets

Logistics Assistance Program

Armey Sustainment Command (ASC) integrates and synchronizes the delivery of U.S. Army Materiel Command capabilities and enablers at the operational and tactical points of need in order to enable Army readiness, strength and speed. ASC bridges the national sustainment base to Soldiers in the field, bringing together the capabilities of AMC's subordinate units to ensure Soldiers have what they need, when they need it, based on the Sustainable Readiness Model. ASC is the "face-to-the-field" for maintenance and logistics solutions. ASC provides materiel management of major end items such as tanks and mine-resistant ambush-protected vehicles, and sustains, maintains, and modernizes them for combat brigades. The command is involved in the retrograde of excess equipment from combat areas to support Army requirements.

Army Field Support Brigades (AFSBs) receive equipment no longer required in the field, maintain accountability for it, reallocate it based on condition and Army requirements, and arrange for shipment to its destination.

Logistics Readiness Centers (LRCs) manage materiel and support services to Army units, performing tasks such as ammunition management, equipment maintenance, hazardous materials operations, central issue facilities, bulk fuel, personal property, transportation, food service and demand supported supply.

The Logistics Civil Augmentation Program (LOGCAP) provides support services to deployed Soldiers, joint forces, non-military federal agencies and coalition forces in locations throughout the world by providing basic life services to the troops, building base camps and taking them down as required. LOGCAP also maintains plans to support humanitarian contingencies when needed.

The Army Prepositioned Stock Sets (APS) program stores materiel on land and aboard ships at sea for emergency combat and humanitarian contingencies. These warehouses store major items, repair parts and life support materiel, giving the Army the flexibility to go anywhere, at any time, with the logistics support needed to get the job done.

Throughout the **Logistics Assistance Program**, civilian employees provide AMC unique capability to combat brigades throughout the Army, working with and training Soldiers to repair and maintain major items at the field level.
