

U.S. ARMY MATERIEL COMMAND

MISSION

The U.S. Army Materiel Command develops and delivers materiel readiness solutions to ensure globally dominant land force capabilities.

VISION

Army Materiel Command is operationalized as the Army's materiel integrator, synchronizing capabilities and resources to ensure Army materiel readiness solutions.

SUBORDINATE COMMANDS

Army Contracting Command

Aviation and Missile Command

Army Sustainment Command

Communications and Electronics Command

Joint Munitions Command / Joint Munitions & Lethality Life Cycle Management Command

Military Surface Deployment and Distribution Command

Tank-automotive and Armaments Command

Army Security Assistance Command

*Research, Development and Engineering Command

Armey Materiel Command (AMC) is the Army's primary logistics and sustainment command, responsible for the synchronization, integration and delivery of materiel readiness across the Total Force to defend our Nation, assure our allies and deter potential adversaries. The command, headquartered at Redstone Arsenal, Alabama, also has a presence or impact in all 50 states and more than 150 nations.

As one of four Army Commands, AMC synchronizes, integrates and operationalizes the capabilities of nine major subordinate commands, providing materiel and sustainable readiness to meet today's requirements and prepare for the next contingency.

The command's complex missions range from manufacturing and maintenance to transportation and technological upgrades. From managing the Army's arsenals, depots and ammunition plants, to maintaining Army Prepositioned Stocks, both on land and afloat, the Army Materiel Command assures supply availability -- ensuring America's fighting force has the right equipment in the right location and the right time. Army Materiel Command touches every phase of the materiel life cycle, from research and development to contracting, distribution, refurbishment and resale.

Army Materiel Command's workforce includes more than 60,000 Soldiers and Department of the Army Civilian employees worldwide. Another 60,000 contractors support the command's mission to deliver materiel readiness solutions.

Army Materiel Command was activated in 1962 - the result of merging several technical services, installations and activities as a single, integrated organization designed to provide the Army's weapons and equipment. Since its inception, Army Materiel Command has played significant roles in supplying wars, conflicts and contingencies and providing humanitarian aid and disaster relief.

**Throughout the years, Army Materiel Command has transformed to meet current Army priorities. Research Development and Engineering Command is working specified tasks from AMC in preparation of its transition to the Army's newest organization, Army Futures Command. All RDECOM entities will move to the new four-star command, headquartered in Austin, Texas, in FY19.*
