

# U.S. ARMY MATERIEL COMMAND

## TANK-AUTOMOTIVE AND ARMAMENTS COMMAND

### PRIMARY LOCATIONS

Headquarters  
Detroit Arsenal, Michigan

Anniston Army Depot  
Anniston, Alabama

Joint Systems Manufacturing Center  
Lima, Ohio

Red River Army Depot  
Texarkana, Texas

Rock Island Arsenal - Joint  
Manufacturing and Technology Center  
Rock Island, Illinois

Sierra Army Depot  
Herlong, California

Watervliet Arsenal  
Watervliet, New York

**T**ank-automotive and Armaments Command (TACOM) unites all the organizations that focus on Soldier and ground systems throughout the life cycle. TACOM develops, acquires, fields and sustains Soldier and ground systems for America's Warfighters. If a Soldier eats it, wears it, drives it, or shoots it, TACOM develops, provides or sustains it.

TACOM works across various organizations, including the Integrated Logistics Support Center, Program Executive Office (PEO) Combat Support and Combat Service Support, PEO Ground Combat Systems, and PEO Soldier, to integrate Soldier and ground system life cycle management.

The command has operational control of U.S. Army Tank Automotive Research, Development and Engineering Center and Army Contracting Command-Warren, and works closely with U.S. Army Armament Research, Development and Engineering Center; Natick Soldier Research, Development and Engineering Center; Edgewood Chemical Biological Center; Joint Program Executive Office for Chemical and Biological Defense; and the System of Systems Integration and Engineering Directorate.

TACOM plays a vital role in the Army's efforts to sustain, prepare, reset and transform its operations. The command manages its products, people, processes and culture in order to deliver warfighting capabilities and to enhance Soldier readiness. Successful execution of its mission requires effective communication and coordination among the acquisition, logistics and technology organizations that are part of TACOM and the Army's materiel enterprise.

As part of the AMC Organic Industrial Base enterprise, TACOM is responsible for six depots, arsenals and manufacturing centers, including the Joint Systems Manufacturing Center-Lima, Watervliet Arsenal, Anniston Army Depot, Red River Army Depot, Sierra Army Depot and the Rock Island Joint Manufacturing and Technology Center. These locations manufacture and remanufacture major end items and components that support the U.S. military. Some components are critical repair parts that support TACOM's supply chain, including engines, alternators and axles.
